PROFILE

Passionate Full Stack Developer specialized in React, Angular, Java/Spring Boot, and microservices architecture. With intensive training at YouCode and hands-on internship experience, I build robust and modern web applications with a strong focus on code quality, scalability, and user experience.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern – Java/Angular BINEWVISION

Apr 2025 – Present
Casablanca

Contributed to the development of a Digital Twin platform interactive infrastructure visualization. Utilized Angular for frontend and Java/Spring Boot for backend development.

Full Stack Developer Intern – PHP/React AlloBaba

May 2024 – Jul 2024
Marrackesh

Developed an OCR extension using Tesseract.js for extracting text from images. Built an intuitive frontend with React/TypeScript and a Laravel backend for efficient processing.

EDUCATION

Web & Mobile Development YouCode Safi (UM6P/Simplon.co)

2023 – 2025

Scientific Baccalaureate, specializing in Physical Sciences

2022 – 2023

TECHNICAL SKILLS

Programming Languages

Java | PHP | JavaScript | TypeScript

Frontend

React | NextJs | Angular | Tailwind CSS

Project Management

Agile | Scrum

Architecture & Modeling

Microservices | Domain Driven Design (DDD) | UML | StartUML

Backend

JEE | Spring Boot | Laravel

Databases

MySQL | PostgreSQL | MongoDB

Management and planning tools

Jira | Trello

DevOps & Tools

Docker | CICD (Github Actions) | Git | GitHub

PROJECTS

FIFA Football Tournament Management Platform

Built a full-stack web platform using React (frontend) and Spring Boot (backend) for organizing and managing FIFA tournaments. Integrated PostgreSQL, JWT authentication (Spring Security), and automated deployment via Docker and GitHub Actions.

E-Commerce Microservices Platform – Spring Boot / React

Designed a complete e-commerce system with a microservices architecture (product, user, order services) using Spring Boot. React frontend managed state with Zustand. Integrated Kafka for inter-service communication and CI/CD pipelines with Docker and GitHub Actions.

Bookify – Library Management with Community Features

Created a library management web application with user interactions, borrowing system, and community integration. Built with Laravel, Blade, JavaScript, AJAX, jQuery, HTML, and Tailwind CSS.

Citronix – Lemon Farm Management System

Developed an application to manage lemon production, harvest, and sales using Spring Boot and a DDD (Domain-Driven Design) architecture.

LANGUAGES

Arabic: Native

Frensh: Advanced

English: Intermediate

INTERESTS

DevOps practices (CI/CD, Docker, monitoring), AI integration in web applications.
